

Everleaf

OATS

Characteristics

Growth Habit	Cool-season annual
Plant Height	Medium
Planting Rate Irrigated	70-100 lbs/ac
Planting Rate Dryland	~50 lbs/ac
Yield Potential	High
Leafiness	Very High
Forage Quality	Excellent
Rust	Resistant
Leaf & Stem Diseases	Gen. Resistant
Leaf Spot	Mod. Resistant

Primary Uses:

- Grazing
- Silage
- Haylage

Key Attributes:

- Produces higher leaf-to-stem ratios
- Exhibits higher forage quality and more leaf mass
- When compared with many forage oats, Everleaf exhibits an improved crude protein contributing to a better feed quality

This is for your information only. Please note ratings and descriptions of products are based on research and field observations from multiple locations and years. **Performance may vary** from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of those conditions on the grower's field. Always read and follow IRM, where applicable, grain marketing, stewardship practices, and pesticide label directions.
