

Goliath

OATS

Characteristics

Growth Habit Upright, Leafy, Tall Forage
Plant Height ~3-5 ft
Planting Rate Irrigated 80-100 lbs/ac
Planting Rate Dryland 50-70 lbs/ac
Yield Potential High
Leafiness High
Forage Quality Good
Rust Good / Improved Resistance
Standability Moderate
Drought Tolerance Moderate
Cold Tolerance Good

Primary Uses:

- Forage
- Hay
- Silage
- Grain

Key Attributes:

- Has a strong, broad disease resistance package
- Strong adaptability
- Excellent biomass & grazing value
- Excellent early vigor and canopy closure

This is for your information only. Please note ratings and descriptions of products are based on research and field observations from multiple locations and years. **Performance may vary** from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of those conditions on the grower's field. Always read and follow IRM, where applicable, grain marketing, stewardship practices, and pesticide label directions.
