

Stockford

BARLEY

Characteristics

Maturity	Mid-Season
Growth Habit	Erect Early Growth
Plant Height	30-32"
Planting Rate Irrigated	90-110 lbs/ac
Planting Rate Dryland	65-85 lbs/ac
Yield Potential	Good
Standability	Good
Test Weight	Good
Drought Tolerance	Fair to Good

Primary Uses:

- Hay
- Silage
- Grazing
- Forage

Key Attributes:

- Reliable Standability
- Good forage yield and feed quality
- Strong adaptation to dryland systems
- Good early Spring performance

This is for your information only. Please note ratings and descriptions of products are based on research and field observations from multiple locations and years. **Performance may vary** from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of those conditions on the grower's field. Always read and follow IRM, where applicable, grain marketing, stewardship practices, and pesticide label directions.
