

## GRAIN SORGHUM

### Agronomic Traits

1=Excellent – 10=Poor

Seedling Vigor .....	5
Plant Uniformity .....	2
Root Lodging .....	4
Head Exertion .....	4
Yield for Maturity .....	3
Test Weight .....	4
Charcoal Rot .....	4
Downy Mildew R3 .....	6
Head Smut .....	4
MDMV .....	5
Sugarcane Aphid* .....	1
Pre Flowering Drought Tolerance .....	2
Post Flowering Drought Tolerance .....	3

\*Tolerance confirmed in third-party testing conducted by the Agricultural Research Division of the US Department of Agriculture in Stillwater, OK.

### Characteristics

Relative Maturity .....	Early
Days to Mid-Bloom .....	60
Grain Color .....	Bronze
Head Type .....	Semi-Open
Approx. Seeds / Lb .....	13,000-15,000
Plant Height .....	30-36"
Greenbug Resistance .....	None
Sugarcane Aphid Tolerance .....	Highly Suitable

### Key Advantages

- Excellent yield for maturity
- Strong drought tolerance
- Adaptable across a wide range of growing conditions
- Sugarcane aphid tolerance
