PowerPro 4.5Dormancy

CONV. ALFALFA

KEY ADVANTAGES

- Highly resistant to multiple yield-robbing alfalfa pests including root-knot nematode and stem nematode
- Above average performance, standability, and forage quality
- Excellent yield potential through a variety of soils

MAJOR PEST RESISTANCE

Pest Resistance Rating Scale: Highly Resistant, Resistant, Moderately Resistant, Low Resistance, Susceptible

Anthracnose ..... Highly Resistant
Phytopthora Root Rot ..... Highly Resistant
Aphanomyces (race 1) ..... Highly Resistant
Aphanomyces (race 2) ..... Highly Resistant
Bacterial Wilt ..... Highly Resistant
Verticillium Wilt ..... Highly Resistant
Fusarium Wilt ..... Highly Resistant
Stem Nematode ..... Highly Resistant
Pea Aphid ..... Resistant
Spotted Aphid ..... Resistant

AGRONOMIC TRAITS

Rating Scale: 1-7, with 7 being the best

Disease Tolerance..... 7
Yield Ability..... 7
Forage Quality..... 7
Standability..... 7

PGS HYBRIDS

This is for your information only. Please note ratings and descriptions of products are based on research and field observations from multiple locations and years. **Performance may vary** from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of those conditions on the grower's field. Always read and follow IRM, where applicable, grain marketing, stewardship practices, and pesticide label directions.
